We are having regular meetings and correspondence with GSA (General Services Administration), our property owner, as well as the Indiana American Water Company. We are working with these organizations to get one or more connections to the local water company, and plan to switch their water for our facility as soon as we get these approvals in place. We have had GSA staff in Chicago and Indianapolis involved, as well as our headquarters staff in DC, local water company officials, and our water plant operators. At this time, I am hoping to have the proper approvals in place for this connection possibly as soon as later this week. Once all approvals are in place, then we can schedule the work to begin.

We have also requested and received a proposal for the installation of a filtration system to our water plant. This would be a very expensive addition to our system, and have no approvals yet for this project to go forward. I do not have the authority to approve this for our facility (and realize it will need state approval as well), nor do I have the approval of GSA for this. This is still being discussed.

But I hope to have the approval to hook up to IAWC very soon.

Matt

Subject: RE: Corrective Action Plan, and change in water plant operator

Hello All,

I am following up on this matter and I need to have an update regarding your steps for corrective action on the TCE MCL for the public water supply. I have not received any other correspondence, since the below email, from your system regarding this matter. I need to know how this is progressing, what steps you have and are taking to correct this, and what the status of the alternative water supply is.

Thank you for your cooperation,

Karla Goodman

Subject: Corrective Action Plan, and change in water plant operator

Karla, attached is the Bureau of the Census corrective action plan for our water issues. Please review and let me know if OK.

Also attached is a letter with regard to the change in the Water Plant manager from Harold Harned to Jack Cleveland. This is your copy, and I will mail a copy to Ms Winters.

Any questions, let me know. Though we are facing a government shutdown and could be closed down effective tomorrow.

Matt
